THE AIM OF INNOVATION
IS TO CREATE VALUE IN EVERY AREA OF LIFE

At metaloBox®, we firmly believe that the final quality that is felt and appreciated by our customers depends on the finer details of our products, and on their durability and practicality. It is important that we innovate not for its own sake, but to bring benefits to our customers and to help improve the quality of life among those who use our products day by day.

This catalogue is the result of many years' development work, and provides an overview of the products we recommend/supply to educational establishments. Our aim is to enable you, with the help of our lockers and accessories, to arrange comfortable, attractive and practical changing rooms that will improve the atmosphere of your school and make your students feel happier. Lockers from metaloBox® have a competitive price-quality ratio, and bring you a professional solution for changing rooms that are cultured and comfortable.

Peter Major
managing director

Izbégi Primary School
Szentendre
Mrs Ferenc Stomp – Director

"We first contacted metaloBox® in August 2011, when we decided to give our students the possibility to use lockable cupboards. Our students in the last four years of primary education use the lockers. We bought the short-door version because that was the most space-saving. The cupboards are deep and well-designed enough for the students to fit all their things in them. We chose metaloBox® products because in terms of quality and price they are, for us, the best on the market at the moment. We were also extremely satisfied with their "service" and their helpfulness. The goods are beautiful and easy to clean. Delivery and installation was done properly and professionally. We were satisfied then and we still are."

SHORT DOOR LOCKERS

If the corridor is so short of space that even the "Z"-door lockers don't fit, I would recommend this solution to our partners. I'd suggest this type of locker **if the students don't have too much with them,** and they don't need to keep bulky objects like long coats and big bags in their lockers.

Erika Kelemen – Sales Representative

No. 1. Primary School
Budaörs
Zsuzsanna Simsik – Director

"For quite some time now we have been considering ways of organising storage for the students of our institution in the corridors. We found out information about several types of furniture before we opted for metaloBox® lockers. The ideal solution for us was the "Z"-door locker, because they offer plenty of room for clothes, yet there is still enough space for the PE kit and the school items. We ordered lockers with the master key system, which is very practical, because it solves the problem when students leave their keys at home. metaloBox® also gave us a lot of help in choosing the colours, and drew up different plans for us to look at, so we could find the one that best suited the school environment. We're also satisfied with their service and quality, and we would recommend metaloBox® to other schools."

"Z"-DOOR LOCKERS

The most popular lockers among our clients. I recommend them to partners who **have to fit a lot of students into limited changing room space.** The lockers are strong and good-looking, and can even hold long coats in winter.

Anita Oláh – Sales Director

University of Szeged, Sports Centre
Szeged
József Szabó – Director of
the Sports Centre

"The Sports Centre at the University of Szeged organizes regular sports activities for about 6000 students each week. To make sure that all the different groups could get changed in the most attractive and most secure circumstances possible, and keep their valuables safe, we needed the kind of lockers that metaloBox® supplied to us, in addition to which they also served our students' level of comfort. As a result of the organisational and service rules related to changing, there are no thefts from the locker rooms, and the lockers are also perfect for people coming to sport training from outside the university. They do the maximum to meet customer demands in price, delivery, accessories and re-orders."

LONG DOOR LOCKERS

The most widespread and most accustomed solution! There is **space for everything** in these lockers, and plenty of room for coats, bags and shoes. They are perfectly made, and ideal for those partners of ours who wish to look after the changing room needs of their students in the long term.

Kristián Forró – Sales Manager

LAMINO LOCKERS FROM LAMINATED BOARD

Colours available for a surcharge:

- birch
- natural oak
- opal oak
- marbello cherry
- old cherry
- cherry
- wenge
- bavarian beech
- vanilla
- cappuccino
- grey
- burgundy
- orange
- yellow
- pastel green

Basic colour: locker body is white, and the doors in this picture are cherry

The doors and locker body are made from 18 mm thick board.

Extra-strong, chromium-plated rod.

Edges are glued on in the same shade as the board.

Height-adjustable aluminium feet.

LAMINO Z4

Do you prefer the warmer feel of wood-effect furniture?
Our LAMINO range offers lockers of different sizes, with different compartment arrangements, to suit your tastes. These lockers, made from laminated board, are recommended to partners who want to provide their guests with truly beautiful, comfortable and modern changing rooms. Lift the mood of your locker rooms by ordering some of our fun and lively colour doors, available in many variations. The standard colour options – with no surcharge – can be found on the previous page.

BASIC FITTINGS

- ventilation gills
- rod for hanging clothes
- security lock (with two keys)
- height-adjustable aluminium feet

MDF LOCKERS FROM MDF BOARD

Basic colour: locker body is white, and the doors in this picture are RAL 4010 magenta

The doors are made from 16 mm thick MDF (medium density fibreboard) while the locker body is made of 18 mm thick laminated board.

Numbered security locks with extra-long latch.

Rounded, painted edges.

Height-adjustable aluminium feet.

MDF Z4

Items in the MDF range are made from more homogeneous, more solid board. The locker doors – with many different colours to choose from – and the rounded edges give changing rooms a friendly, homely feel. The body is always white, but the doors are supplied – at no extra charge – in the colour of your choice from the RAL scale. You can order lockers from the MDF range in different shapes and compartment sizes to suit your style and your needs.

BASIC FITTINGS

- ventilation gills
- rod for hanging clothes
- security lock (with two keys)
- height-adjustable aluminium feet
- any colour from the RAL scale may be chosen for the doors (at no surcharge)

WALL-MOUNTED VALUABLES LOCKERS WITH SMALL COMPARTMENTS

BASIC FITTINGS

- security lock (with two keys)
- easy to clean rim-free shelves
- reinforced doors

BOX 5/25

Several 25-compartment valuables lockers can be mounted next to each other, or above each other, to make a single, attractive safe-keeping system of whatever size you need. The system can also be expanded at a later date. When students have put their valuables in the compartment, they get the key it was locked with, and in an ideal situation, they can use the same key to open their changing room locker. The solution is practical, simple and very cost-effective in the long run, because it encourages students not to lose their keys!

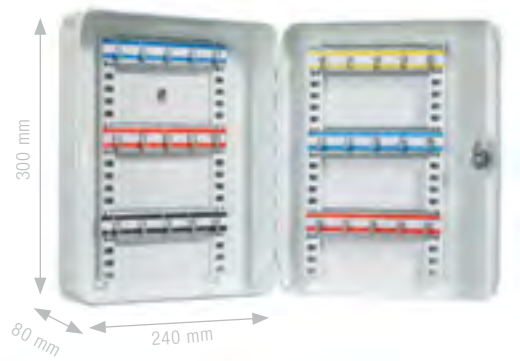

Material: grade I steel sheets **Basic colour:** RAL 7035 / light grey **Painting:** electrostatic powder coating

KEY CUPBOARD

For the storage of spare keys in a single-door design, with spaces for 30-200. The coloured indicators and documentation ease orientation among the keys.

Barabás György Technical Secondary Vocational School and Specialist School

Sárvár

Albert Barasits – Technical Deputy Director

"Our school was extended in 2005 with an additional training centre of 1200 square metres. We needed a quality, modern changing room for our students using the practice workshop. Our training partners recommended metaloBox® products to us. In their catalogue we found the Project range of lockers, with fitted benches, which were perfect for us. The service we received and the quality of the products have both convinced us that we made the right choice when we accepted the offer from metaloBox®."

SITTING-BENCH LOCKERS

PROJECT 4

OSP PR 4-4/8-3FF

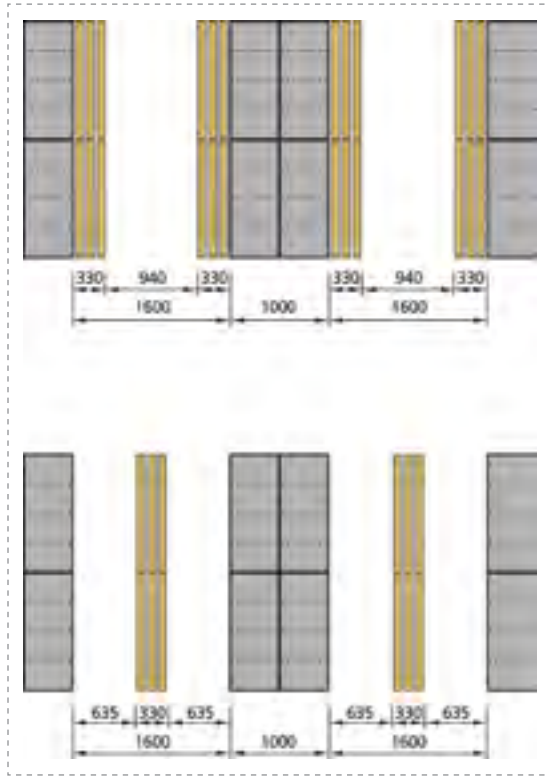

Please call us for the complete range of models!

The bench fitted beneath the lockers is a great solution for hygiene and cleanness. Students can always find **a comfortable place to sit and get changed,** and it's easy to clean under the lockers.

Davor Varošanec – Sales Manager

MAY BE ORDERED FOR LOCKERS!

Lockers fitted with benches offer a space-saving solution, leaving more room between the lockers for getting changed and moving around.

AT METALOBOX® IT'S ALL INCLUDED IN THE PRICE!

▲ VENTS IN THE DOORS,
and towels dry inside the locker
because of the efficient ventilation.

▲ NAME CARD HOLDER
for easier identification.

▲ THE 120 MM HIGH FEET
make it easy to clean
under the lockers.

▲ STAINLESS STEEL HOOKS
for trousers and belts.

▲ TOWEL HOLDER
(except "Z" door lockers
and short door lockers)
– no more towels hanging over
the locker doors.

▲ UMBRELLA HOLDER
(except "Z" door lockers
and short door lockers)
– easy to store, and easy to dry.

AT METALOBOX® IT'S ALL INCLUDED IN THE PRICE!

STANDARD BASIC KEY LOCK

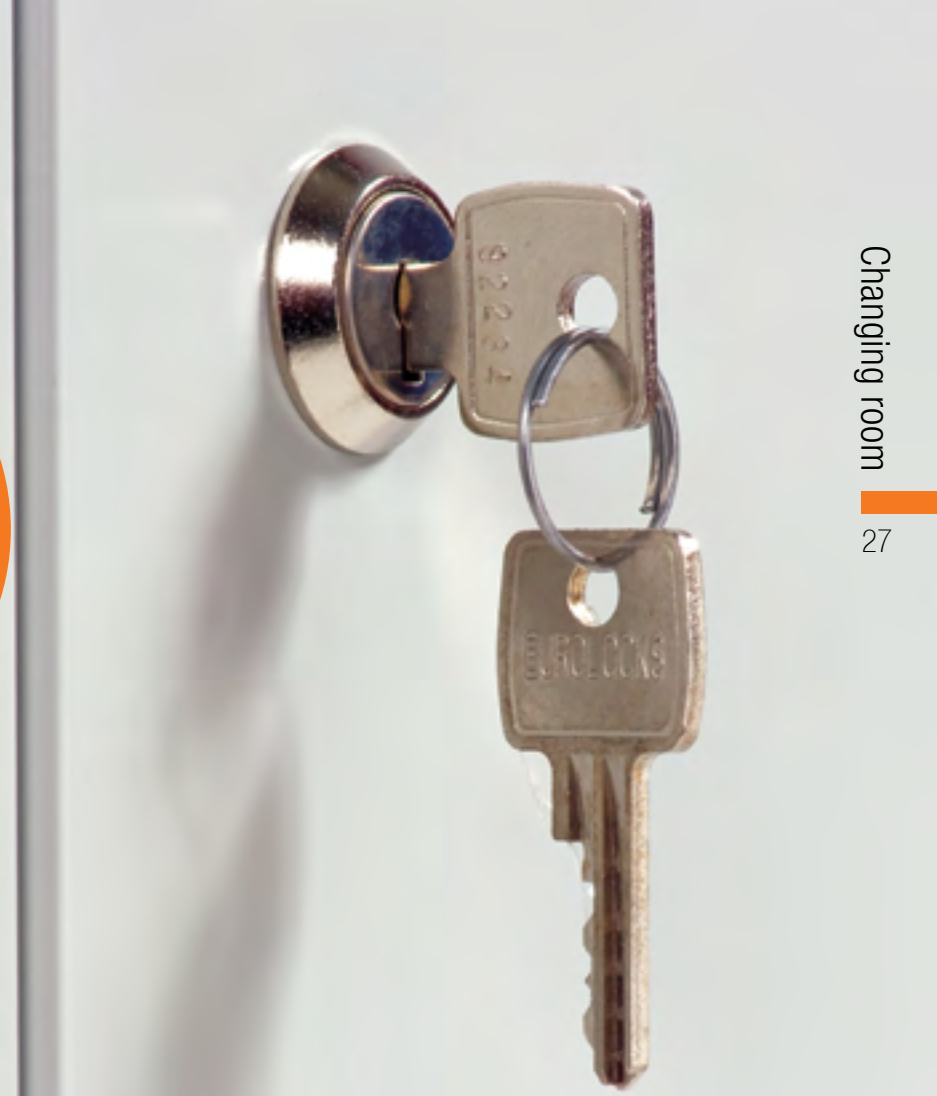

- inflexible cover
- security
- chromium-plated
- with two keys

Professional locks with two keys, come as standard with all ordered lockers.

WHY PAY EXTRA FOR THE LOCK?

Lockers ordered from metaloBox® come with key-locks as standard.

OPTIONAL EXTRAS!

MASTER KEY SYSTEM LOCKS

– if you want maximum security

+ One master key opens everything!

Professional security locks with 2 keys. These locks offer 10,000 combinations, so there is no way that any one key can open more than one lock (metaloBox® lock registration).

+ We provide you with a master key for the whole system, which can be used, if necessary, to open any of the locks in the system!

For details see pages 30-31!

LONGER LIFE

Galvanised footer frames for changing rooms and valuables lockers.

Maximum protection against corrosion!

PRACTICAL SPACE-SAVING

PROJECT / SHELF 300

EXTRA SHELF FOR YOUR LOCKERS

An extra shelf in your locker makes it even easier to keep things in order!

ORDER ON TOP

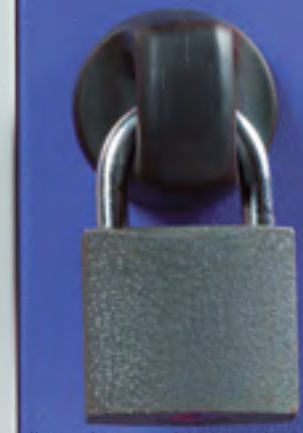

inclined top for changing room lockers

Placing an inclined top on top of the locker (at 30°) makes cleaning easier, as it will remain free from dust and nobody will be able to place rubbish or leftover food on top of the locker.

TOP PR 2FF/30

EXTRA PADLOCK HANDLE

This padlock handle can be rotated 360°, so it can't be used as a lever and can't be pulled off the door.

MAXIMUM COMFORT

WITH ODDS AND ENDS TRAY AND MIRROR

With the aid of our optional accessories for the long door lockers, the comfort of your employees can be further increased.

Újbudai Grosics Gyula
Primary School for Sport
Budapest
Mihály Kiss – Director

"The lockers in the Újbudai Grosics Gyula Primary School for Sport are used by students in years 6, 7 and 8. We ordered lockers with the master-key system, because we felt that these students were mature enough not to lose their keys. We are fully satisfied with this type of lock, because we can also open the lockers of any child who was a bit forgetful. We've needed this quite a few times, which proves we made the right choice. I would happily and honestly recommend metaloBox® lockers with this type of lock!"

THE MASTER KEY SYSTEM WORKS FOR US!

MASTER KEY SYSTEM LOCKS

Students get 1 key for their own locker compartment
– YOU GET 1 KEY WHICH OPENS ALL!

SAFE
Hardened steel tongue, Our key registration guarantees that no two locks in your changing room will have the same key!

EASY TO INSPECT
With the master key you can inspect the contents of the lockers any time!

QUICK AND EASY LOCK REPLACEMENT
No need to drill the lock or force the door open if a key gets lost.

SUSPENDED FILING CUPBOARDS

The metaloBox FILE® units provide an attractive, safe and high-quality solution for everyone working with suspended folders. The heart of this type of storage is reliable and easy-operation drawers. If they get stuck or are not strong enough to stand the weight, or if they are hard to open and close, then what's the use? The FILE® units open and close easily and quietly even when fully loaded. Every folder is easy to reach and replace as the drawers can be pulled out 100%. All the drawers in the unit can be locked centrally. The anti-topple protection comes as standard - only one drawer can be opened at a time, preventing the chance of the unit toppling forward. Choose FILE® units to make your work with documents smooth, in every meaning of the word!

central lock (with two keys)

easy-glide drawers

for A4 suspended files, each drawer can hold 80-100 files

DELIVERY

WHAT IS METALOBOX ON-TIME?

It's quite simple: we deliver when you ask us to. If it's urgent, we can deliver the lockers and fit out your changing rooms in as little as 1-2 days. If your changing area is not yet ready, and you don't want to have new lockers stored in corridors or out in the open, you can count on us to deliver at a time that suits you.

Like the idea?
If you like good timing, then you can trust metaloBox®!

Send us a request for a quotation, and our sales colleagues will contact you immediately. They will prepare a personal quotation based on the products selected in the request (with a discount for larger orders), and discuss with you:

- the ideal delivery time for you,
- the most beneficial delivery terms for you,
- and payment terms that suit you.

DELIVERY WITH NO UNPLEASANT SURPRISES!

We guarantee that our lockers will be delivered to you undamaged, because we transport our lockers in trucks specially built for carrying metal furniture, and our experienced fitters will install them using their expertise.

WAREHOUSE

The largest warehouse stock in Eastern Europe, with catalogue products kept in stock in a choice of colours and sizes

DELIVERY

Our experienced and fully trained mB colleagues are a professional team, using specially-built metal furniture delivery vehicles

FREE, READY-TO-USE INSTALLATION

Delivery includes on-site assembly and installation - free every time!

SERVICE AND GUARANTEE

A one-year full guarantee (except for locks), guaranteed afterorders, rapid repair service

ARE YOUR LOCKERS OLD?

- NOW YOU CAN CHANGE THEM EASILY AND WITH FAVOURABLE TERMS

WE CARRY OUT FREE EVALUATION OF YOUR USED LOCKERS AND DISCOUNT THE VALUE FROM YOUR NEW LOCKERS - AN OFFER YOU CAN'T REFUSE!

Andrássy Gyula
Secondary Vocational School
Miskolc
László Mihalik – Director

"Our school was reorganised when we incorporated the Integrated Vocational Training Centre for the Miskolc Region. The new situation meant we needed new changing rooms, although we had precious little room for them. We needed to find a solution that was space-saving, but which would also be suitable for all the extra clothes in winter. So we chose the "Z"-door lockers, where two students can hang their coats and get changed in the space of one locker. In the competition for the best price/quality ratio, metaloBox® came out victorious. The harmonious, unusual colour combination also played a part in our decision. Our experience of using these lockers so far shows that we picked a winning horse."

Blaskovich János
Primary School
Tápiószele
Mrs Gabriella György Kácsor – Director

"Keeping the future of our children in mind, our local government created a well thought-out and properly equipped 21st-century school for our town. When the new building was being completed, great emphasis was placed on harmonising our school's inside and outside appearance, but keeping everything practical as well. For our older students we installed a row of personal lockers in the corridor, which metaloBox's own experts helped us to design. The "Z" type lockers we chose are roomy enough for coats, PE bags and crafts equipment. When we worked with the company they were accurate and flexible, they kept the delivery deadline exactly, and they cooperated completely fairly. I would hesitate the company and their products to every educational establishment."

American International School
Nagykovácsi

Gabriella Thomas
– Head of Admissions

"We've been customers of metaloBox® for several years, now. We were looking for a long-term solution for our younger students to store their coats and bags conveniently and tidily. We therefore picked lockers with a wider compartment. We did not want to lock the doors, so we chose a key-less option. We feel that the colour doors fit perfectly with the friendly image of our school."

Váci Utcai Primary School for Music and Singing
Budapest
Attila Tölgyszéki Papp – Director

"It's been many years since parents, teachers, and especially students began dreaming of having their own changing room and storage lockers in the school. In November 2012 this dream came true thanks to the local government and to the careful economising at the school. What I was mainly concerned with was having practical and aesthetic furniture with a good price/quality ratio. We also had to find a space-saving solution to fit 200 lockers in our narrow corridors. metaloBox® lockers met all these criteria perfectly. They really add something to the atmosphere in the corridor, and they not only hold coats and bags, but also rollers or violins. I am convinced that this "personal space" is extremely important to our older students, and they can decorate the inside with their own posters and photos."

Pannónia Primary School
Budapest
Mrs Julianna Varsányi Salgó – Director

"Our 100-year-old school was completely renovated not long ago. Inside the school, the "Z" split lockers with coloured doors that we bought from metaloBox® fit in nicely with the modern appearance. We chose this type of locker because of its optimum use of space – lots of compartments in a small area. Because the lessons are all given by specialist teachers, the students move from one lesson to the next, often on different floors. Since we bought the lockers, every student has his or her own compartment, where they can keep their coat and anything else they don't need during the lessons."

Kossuth Lajos Primary School
Tinnye
Adrienn Hargitai – English teacher

"In our newly built, well-equipped school we wanted to offer our students the best possible in terms of comfort and security. For this reason we opted for metaloBox® lockers, which the students moved into joyfully and enthusiastically, and which mean that it is easier to keep the classrooms tidy. Thanks to the lockers, there are no more things hanging around here and there. We are totally satisfied with metaloBox® lockers, for they are of excellent quality, practical and pleasing to look at. Their bright colours liven up the corridors, and bring a friendly atmosphere."
